### Course Description:

Further investigation into observation and accurately representing form in space. The interpretive aspect of drawing and experimentation with drawing media and technique will be explored. Project themes are still life, landscape, and interiors or exterior space in Graphite and Charcoal with an introduction to Color Pencil and Pastels. Students will learn about composition, continue learning about spatial relationship, value contrast, pattern, and texture.

Prerequisites: Drawing fundamentals

### Student Learning outcomes:

- Understand the following drawing techniques; construction drawing/linear structure, Linear hatching, tonal value drawing.
- Understand a tone ground to convincingly draw: the still life and landscape in full value using black and white charcoal and still life in full color in Pastel or Color pencil.
- Understand the properties of color: Hue, value, intensity, and temperature in observational drawing using pastel or color pencil.
- Understand when to utilize hard edges, firm edges, lost edges, soft edges
- Accurately draw the individual characteristics of observed forms and duplicate the properties of light and shadow to create volume
